

## Y'rless PTT

As part of our ongoing drive to innovate in the Microlight Industry, we have developed a new wireless PTT.

### **No more curly cords to twist at speed.**

*Unlike any other systems that have been "Home brewed" the PTT may be double clicked..*

The Y'rless PTT is a plug and play product and fully compatible with all 4 wire aviation systems that use a normally open contact to initiate the radio.

The base station uses a PP3/9v battery and the PTT uses a A23/12 V battery.

Made in South Africa

Alpha Comms and Air Magic from  
RCH Communications cc Unit 3, The Stones, Moffatt Drive, Ballito, 4420
