

## RECORD BREAKING ATTEMPT: GYRO'S IN AFRICA

Gyroplane enthusiasts...This is it ! Never before until now , the coming weekend of 19/20/21 November 2010 , would there have been such a vast congregation of Gyroplanes, all together on one location and on this continent. Certainly a first for Africa in the history of aviation.

The magic of auto rotation, rotor flight, is shared by a privileged group of fanatical aviators . The weekend of 20/21 November will showcase a get together of these gyronaughts from all over Africa , specifically Africa South of the equator.

This will be history made. This will be THE happening that will go down in the annals of aviation history as THE event which showcased and entrenched the fascination of rotor flight shared amongst fellow aviators and the general public.

This will be THE event which will grab the imagination of the next generation of aviators and cultivate a healthy respect and love for the beauty of rotor flight amongst fledgling aviators and the general public as a whole.

Do not lose out on this once off opportunity to be a part of International aviation history made right here on our African doorstep.

We call upon all who have the privilege of spinning up a rotor on a Magni, an Ella , a MT03 , a RAF , a Xenon, a Sycamore, UFO Gyro, Kriek, Springkaan OR WHATEVER YOU FLY ... as long as it is a Gyroplane, to heed to the call ! *GYRONAUGHTS UNITE* and let us introduce the wonderful world of which we have privileged experience to, to the world out there!

From ALL OVER South Africa and neighboring countries, gyronaughts will alight on FASH , Stellenbosch , on the weekend of 19/20/21 November .

Where-ever you are stationed with your gyroplane, we will arrange for you to join one of the many gaggles from all over the country, auto rotating down to the heart of the beautiful Boland for a weekend of the most unforgettable gyroplane experiences you could only dream to have. We will talk gyroplanes, eat gyroplanes, dream , sleep and compare gyroplanes. We will fly gyroplanes ...

If you want to have the incredible privilege to be able to say ..." I was there ! " when this event is talked about and featured on television, on radio, in magazines and newspapers ; e-mail your detail to [johan@noot.co.za](mailto:johan@noot.co.za) if you are based in the Northern parts of the country and to [polis@iafrica.com](mailto:polis@iafrica.com) you are based in the Southern , Eastern of Western parts of the country.

Detailed information on this experience will be posted on [www.microlighters.co.za](http://www.microlighters.co.za) (Gyro Talk) and e-mails to all involved will be forwarded as arrangements are finalized.

We need to know by 5 November 2010 where you are flying from in order to arrange for fuel and accommodation en route and in Stellenbosch. We expect a huge turnout for this 'once in a lifetime' gyroplane experience and would like to encourage you to come aboard immediately and avoid being left behind 'grounded'.

This is your opportunity to entrench yourself in the gyroplane community. Make use of this fun filled , newsworthy event and become part of our extended gyroplane family. The experience and contacts you will gain from flying to and networking in Stellenbosch with likeminded souls who share your passion will be invaluable.

Costs relating to fuel and accommodation will obviously be for your own account. We will facilitate the arrangements, if required ,and link you up with your specific gaggle for your flight down to FASH. All gyroplanes will route via set routes in groups of 5 gyroplanes per gaggle.

Plan your diary NOW and e-mail immediately. We need to get the 'greatest show of all' on the road... or rather, in the air!!
