Air Magic Condor helmet

Introduction

The new series Condor helmet is made for the Pilot that wants the freedom of the open cockpit but requires some protection in the event of an incident.

Condor helmets are manufactured with hand laid fibreglass. The design is based on a very popular military design. This design has been tested and proven by many armed forces worldwide. Benefits from this are lightweight, universal fitment, extreme comfort and of course a very economical price.

Most headsets will operate with the Condor helmet, but Peltor style headsets may be bolted into the shell allowing the ultimate in comfort.

A clearance between the inner harness and the shell allows a GA headset band to fit.

The Condor helmet is designed for use with either Oakley or Fox goggles
Sunglasses may also be worn.

Rear Goggle retaining strap

Fully adjustable spider harness
(Military specification)

Condor helmets are available standard in Red, White, Blue, Black, Yellow in gloss.
Available by special order in military colours, Olive drab, Desert sand, NATO blue, Covert black
Navy Blue(press colour) for the discerning pilots.

Air Magic and the wings device are trade marks of RCH Communications cc
